Subject:

subject search request

US case 10/099,880, claims priority to 60/276,659, filed <u>03/16/2001</u> Inventor: Weksler, Marc C.

Please search for the following claimed subject matter:

measurement of the level of anti-beta-amyloid-42 antibody in a biological sample selected from the group consisting of blood, serum and plasma with respect to Alzheimer's disease.

Please note that it is the level of anti-beta amyloid (or anti-A-beta peptide, or anti-amyloid) antibody itself (an auto-antibody to be precise) that was measured, and not the amount of A-beta peptide, or amyloid peptide.

Please do not hesitate to contact me should you have any questions. I'm ready to come and provide more explanation on the subject.

Thank you very much!

Olga N. Chernyshev AU1646 REM 4E84 20870 mail box 4C70
